

LINTECH ANNOUNCES EXCITING PARTNERSHIP EXPANSION

We are excited to announce our expanded partnership with LANXESS Material Protection Products (MPP). Effective **January 1, 2026**, Lintech International will serve as the Industrial Preservation (Biocides) distribution partner for LANXESS across the Northeast, Southeast, and Southwest regions of the United States.

By combining a broader geographic footprint with additional LANXESS biocide products, we are strengthening our ability to deliver high-performance preservation solutions across multiple markets.

LANXESS samples are examined under the microscope to determine the efficacy of biocidal products.

With our extended partnership, Lintech will offer an expanded LANXESS biocide portfolio, including:

- **Glutaraldehyde 50% (Non-EPA registered Glutaraldehyde)**
- **KATHON™ CG/ICP II (1.5% CMIT/MIT)**
- **KATHON™ CG/ICP (1.5% CMIT/MIT)**
- **UCARCIDE™ 25 (25% Glutaraldehyde)**

These products enhance our existing LANXESS portfolio, which already includes in-can preservatives, dry-film preservatives, and quick-kill additives.

Connect with our sales team to learn how these expanded LANXESS biocides can support your application needs.
